Dance API

class **mini.apis.api_behavior.StartBehavior**(*is_serial: bool = True, name: Optional[str] = None*) [source]

Bases: `mini.apis.base_api.BaseApi`

Start dancing API

Control the robot to start dancing

Parameters:
- **is_serial** (*bool*) – Whether to wait for a reply, the default is True
- **name** (*str*) – expressive name, cannot be empty or None

#ControlBehaviorResponse.isSuccess: Is it successful, True or False

#ControlBehaviorResponse.resultCode: Result Code

async **execute**() [source]

Perform the start dance instruction

Returns: ControlBehaviorResponse

class **mini.apis.api_behavior.StopBehavior**(*is_serial: bool = True*) [source]

Bases: `mini.apis.base_api.BaseApi`

Stop dancing api

Control the robot to stop dancing

Parameters: **is_serial** (*bool*) – Whether to wait for a reply, the default is True

#ControlBehaviorResponse.isSuccess: Is it successful, True or False

#ControlBehaviorResponse.resultCode: Result code

async **execute**() [source]

Execute stop dance instruction

Returns: ControlBehaviorResponse
